

WEBINAR ON “Participation and Contribution in ITU and 3GPP”

In today's connected world powered by information and communication technologies, inter-operability, user experience, security aspects, lifecycle costs etc. are ensured through the comprehensive collaborative process of standardization of technologies. ITU and 3GPP are the main international bodies coordinating & synergising the efforts of Standards Development Organizations worldwide in the field of ICT. In India Telecom Engineering Centre, Government of India and TSDSI coordinate this process. This webinar aims to spread awareness about the process of contributions and opportunities for Start-ups, established industries, academia and professionals to be part of the standards development process.
